

PARTS LIST

EFFECTIVE DATE	MODEL NUMBER	PRODUCT GROUP
REVISED MARCH 2001	WA6500	RANGE HOOD

* Please ask the following (2) questions in order to determine the correct version:

- 1.) Removing the filter assembly, does your hood have a **motor bracket** which is white and is positioned between the motor and the blower wheel or is the **motor bracket** silver and positioned between the motor and hood top?
- 2.) Is your **blower wheel** held on the motor shaft by a cotter pin or a 'hairpin' running through the end of the motor shaft, or is it held on the motor shaft by a clamp which surrounds and compresses the **blower wheel** shaft?

* Determination of the appropriate version:

- 1.) If the **motor bracket** is silver and the **blower wheel** uses a clamp, it is the 'Original' version.
- 2.) If the **motor bracket** is white and the **blower wheel** uses a clamp, it is 'Revision "A"'.
- 3.) If the **motor bracket** is silver and the **blower wheel** uses a cotter pin, it is 'Revision "B"'.
- 4.) If the **motor bracket** is white and the **blower wheel** uses a cotter pin, it is 'Revision "C"'.
